

TSA's Travel Tips

Before you go...

- Visit www.tsa.gov for all the latest security policies.
- Liquids, gels, and aerosols are permitted in 3 ounce containers, placed in a 1 quart-size, clear plastic, zip-top bag, one bag per traveler.
- Medically necessary liquids like breast milk, baby formula, and insulin, are permitted and must be declared to a security officer at the checkpoint.
- Pack valuable and fragile items in your carry-on.
- Remove all items from pockets and any accessories, including wallets, belts, money and keys, before going through screening. Removing these items will reduce the need for additional screening.
- To avoid leaving any personal items behind, place them in carry-on bags prior to entering the checkpoint.
- If carrying a firearm, please check with your airline for appropriate procedures.

Three Simple Steps to Security

- Show your government-issued ID and boarding pass to the security officer at the checkpoint.
- Take your 3-1-1 bag out of your carry-on and place separately in bin. Declare all medically necessary liquids to a security officer at the checkpoint.
- Take laptops and other large electronics out of their cases and place in a separate bin for X-ray screening.
- Remove footwear and place in a bin for. Wearing footwear that can be easily removed helps speed the process. Please also remove jackets and sweaters and place in a bin.
